

Kayode Okedigba

Product Designer & Full-Stack Builder

Lagos, Nigeria · michaeloluwakayode@gmail.com · thekayode.com · linkedin.com/in/oluwakayode-okedigba

SUMMARY

Product designer and full-stack builder with 5+ years of experience. Designs and ships SaaS products end to end, from Figma to production React, TypeScript, Supabase and Cloudflare. Has launched 7 Framer plugins and 10+ SaaS products, including three self-founded products used by 300+ builders, and has worked with funded startups such as SwarmZero AI.

EXPERIENCE

Founder, Product Designer & Engineer · Framergenie, Gately, Supasync 2024 – Present

- **Framergenie:** designed, built and monetised a Framer plugin that connects Framer to Supabase, giving no-code builders auth, real-time data, forms and protected content. It has 300+ builders.
- **Gately:** built an all-in-one membership platform for Framer and modern websites that covers authentication, gated content, memberships and monetisation.
- **Supasync:** built and exited a Framer CMS plugin that syncs Supabase tables from any schema into Framer (2025 – 2026).
- Own every stage of each product: research, UX/UI, full-stack development, pricing, Framer Marketplace listing and launch content.

Web Designer-Developer · SwarmZero AI 2024 – Present

- Design and develop the website for a funded AI-agent startup, turning product and brand direction into responsive production pages.

Contract Designer & Developer · Planbase, Designdashes 2025 – Present

- Design and build product features and web experiences for client apps, working across design and frontend implementation.

Graphic & Web Designer · Full-time & freelance 2019 – 2024

- Designed brand identities, graphics and websites for brands, small businesses and startups.
- Moved into independent product work by building with Framer and no-code tools.

SELECTED PROJECTS

- **Peersheep (peersheep.com):** an AI competitor-analysis agent. It analyses a product's website and data against its competitors, compares them side by side and turns the findings into actionable recommendations to help teams scale.
- **Bleatr & Famturf:** cross-platform goat and rabbit farm management apps for iOS, Android and the web, with voice input, push notifications, a marketplace and multi-language support. Built with React, TypeScript, Capacitor and Cloudflare Workers, D1 and R2.
- **Magana:** an AI-powered speech coach that helps people practise and improve how they speak.

SKILLS

Design: Figma, Framer, product design, UX/UI, prototyping, design systems, brand identity

Engineering: TypeScript, React, Tailwind CSS, Supabase, Cloudflare Workers (Hono, D1, R2, KV), Capacitor (iOS/Android), Firebase, Remotion

Product: MVP scoping, SaaS pricing & monetisation, launches, technical writing (17 published articles on no-code and AI-assisted building)
